

Subject: Overview of the New Website and Accessibility Score

To Sofia Martinez,

I am hoping all is amazing. I am writing to provide you with an update on your website's development and to outline the choices made thus far. The website received an accessibility score of 96 after I used Lighthouse to do an accessibility audit. This shows that users, especially those who use assistive technologies, can easily navigate the website. As the project develops, I will keep an eye out and continue to improve accessible features.

I have also created a few pages for your website. These pages are designed as a kawaii anime online store, featuring a playful, pink colour scheme and a visually appealing layout consistent with the kawaii aesthetic.

The pages include:

- A section dedicated to anime reviews, giving users engaging content and encouraging repeat visits.
- An integrated online store where customers can browse and purchase anime-related merchandise.
- About Us Page: Introduces your brand, mission, and passion for kawaii anime culture.
- Contact Page: Includes your business email, number, and space for social links so customers can easily reach you.

The kawaii theme serves as the website's unique selling point, helping it stand out from competitors and attracting fans of this popular visual style.

If you have any feedback or would like to request further adjustments, I would be happy to make any revisions you need.

Kind regards,
Jillian and Yen
